
VDV-Schrift Nr. 236 - "Air conditioning of buses of the classes I (Urban bus) and II (Suburban bus), for conventional diesel and gas buses as well as for hybrid, fuel cell and electric buses"

20. März 2019

Edition 11/2018

The VDV Recommendation 236 deals with the latest developments in Air conditioning for buses.

The focus is on reducing energy consumption, as well as respecting the specific requirements of a battery-electric bus. The Recommendation describes the technical specifications for an effective Air Conditioning of a bus.

It is based on the experience of the VDV member companies and considers the state of the art.

This edition of VDV Recommendation 236 supersedes VDV Recommendation 236 from 2015.

Table of Contents

Preface	4
General Information	6
1 Requirements for the Air Conditioning of Line-service Buses	7
1.1 Interior Temperature	7
1.2 Air and Flow Velocity	9
1.3 Air Humidity	10
1.4 Fresh Air/Re-circulated Air	11
1.5 Air Exchange	11
1.6 Air Purity	11
1.7 Noise Emission	11
1.8 Thermal Insulation	12
2 Design Requirements for HVAC Systems	13
2.1 General Requirements	13
2.2 Open HVAC Systems	14
2.3 Hermetically Sealed HVAC Systems	14
3 Control System	15
3.1 Passenger Compartment	15
3.2 Driver's Workplace	16
Technical Rules – Standards and Recommendations	17
List of Figures	18
Imprint	19
